Structural engineering software, spreadsheets, for analysis and design, including wood, lateral analysis, concrete, steel, aluminum, glass, masonry, bridge, foundation.

### **Engineering International - Structural Design Software**

Steel design, or more specifically, structural steel design, is an area of knowledge of structural engineering used to design steel structures. The structures can range from schools to homes to bridges. In structural engineering, a structure is a body or combination of pieces of rigid bodies in space to form a fitness system for supporting loads.. Structures such as buildings, bridges, aircraft ...

Can someone explain in really simple terms the difference between ASD and LRFD? ASD seems easier but is it going away? I was reading through the new AISC Steel Construction Manual about the two methodologies and, aside from the different load combinations, was having a hard time seeing a clear distinction between the two.

### **Explain ASD vs LRFD to a dumb ME - Structural engineering**

An I-beam, also known as H-beam (for universal column, UC), w-beam (for "wide flange"), universal beam (UB), rolled steel joist (RSJ), or double-T (especially in Polish, Bulgarian, Spanish, Italian and German), is a beam with an I or H-shaped cross-section. The horizontal elements of the "I" are known as flanges, while the vertical element is termed the "web".

### **I-beam - Wikipedia**

IHS Markit is your source for US and international engineering and technical standards, specifications, codes, and training materials in hardcopy or PDF download.
