A market is a mechanism through which buyers and sellers interact to set prices and exchange goods and services. In a market system, everything has a price, which is the value of the good in terms of money (the role

### **Markets and Government in a Modern Economy**

Samuelson's Economics provides the non-professional economist (the student, businessperson, politician etc) with the principles of economics, presented in ways that are relevant to them, and relate to the issues they see and face in the world. Economics has not remained static; rather, it has developed over time.
