Various studies report national energy consumption for industrial drying operations ranging from 10-15% for USA, Canada, France, and UK to 20-25% for Denmark and Germany. The latter figures have been obtained recently based on mandatory energy audit data supplied by industry and hence are more reliable.

## **Handbook of Industrial Drying, Fourth Edition by Arun S**

Presents Drying Breakthroughs for an Array of Materials. Despite being one of the oldest, most energy-intensive unit operations, industrial drying is perhaps the least scrutinized technique at the microscopic level. Yet in the wake of todayâ€™s global energy crisis, drying research and development is on the rise.
