

### **performance based seismic design pdf**

Performance-Based Building Design is an approach to the design of any complexity of building, from single-detached homes up to and including high-rise apartments and office buildings. A building constructed in this way is required to meet certain measurable or predictable performance requirements, such as energy efficiency or seismic load, without a specific prescribed method by which to ...

### **Performance-based building design - Wikipedia**

Seismic analysis is a subset of structural analysis and is the calculation of the response of a building (or nonbuilding) structure to earthquakes. It is part of the process of structural design, earthquake engineering or structural assessment and retrofit (see structural engineering) in regions where earthquakes are prevalent.. As seen in the figure, a building has the potential to 'wave' back ...

Authored by NCSEA. Many publications on lateral design do not address the design of diaphragms, chords and collectors in much detail. This Guide fills that void by explaining the role that diaphragms, chords and collectors play in buildings and providing detailed examples of how to determine the seismic forces and design the diaphragm, chords and collectors for various types of buildings ...

This has been superseded by a new document "The Seismic Assessment of Existing Buildings" that is available from at [www.EQ-Assess.org.nz](http://www.EQ-Assess.org.nz). As of 1 July 2017, the new guidelines need to be used when carrying out seismic assessments of existing buildings within New Zealand.
