Food hygiene - Food and Agriculture Organization

Hazard analysis and critical control points, or HACCP (/ ˈ ɛ ː h ˌ ɑː s ˈ ɔː p / [citation needed]), is a systematic preventive approach to food safety from biological, chemical, and physical hazards in production processes that can cause the finished product to be unsafe and designs measures to reduce these risks to a safe level. In this manner, HACCP attempts to avoid hazards rather than attempting ...

Hazard analysis and critical control points - Wikipedia

The core principles of safety engineering and cardinal rules of hazard control. Discussion includes what an 'accident' is, the accident process, producing and proximate causes, foreseeable and unforeseeable accidents, unsafe acts and conditions, and engineering and work methods hazard control. The Peelian principles summarise the ideas that Sir Robert Peel developed to define an ethical police force. The approach expressed in these principles is commonly known as policing by consent in the United Kingdom and other countries such as Canada, Australia and New Zealand.. In this model of policing, police officers are regarded as citizens in uniform.
