

security information event monitoring pdf

Overview. The acronyms SEM, SIM and SIEM have been sometimes used interchangeably. The segment of security management that deals with real-time monitoring, correlation of events, notifications and console views is known as security event management (SEM). The second area provides long-term storage as well as analysis, manipulation and reporting of log data and security records of the type ...

Security information and event management - Wikipedia

What is NSA's role in U.S. cybersecurity? Our main role is to help protect and defend National Security Systems: These include networks that contain classified information, or that are otherwise critical to military and intelligence missions.
